

Rondo

1 BUILT-IN EXTENSION WITH 45 CM BUTTERFLY OPENING.

Wonderfully combining a contemporary look with ease of use, the Rondo table boasts distinctive clean lines and a high level of practicality.

An excellent space-saving solution, its butterfly extension mechanism increases your seating capacity from four to eight guests with virtually no effort involved.

Once the extension system is deployed, the mechanism remains invisible and this elegant, designer table then returns to its long shape (120 cm + 45 cm) without losing any of its ergonomic curve.

Note that the ceramic versions come with a melamine extension to make them easier to open and clean, as well as making them more hardwearing.
